

Profile Summary:

Liquid Activated Carbon– Sufficient up to 6 Gallons

APPLICATION: Powdered activated carbon slurry for use in purification of fermented alcoholic wash.

DIRECTIONS: Use in conjunction with any FermFast yeast to improve final alcohol quality. Massage well before opening to eliminate possible clumping. Add with yeast and stir for approx. 10 seconds. Please note: this product should always be used in conjunction with FermFast DualFine Finings to remove the carbon prior to distillation.

Declared Pack Weight: 140g e

BBE: 24 Months

Ingredient Declarations: Water, activated carbon, xanthan gum, sodium metabisulphite (sulphites).

Allergen Declarations: See allergens in bold.
