Then follow up a smaller amount of shampoo. Lather in your hands, apply to your scalp, massage again. This time you will notice more foam and bubbles. That is because the soap has much less to attach itself to which also means your hair is much cleaner than it was a minute ago.

You'll notice when you go longer in between shampoos there will be less suds in the beginning than if you just washed a day or two ago, when your hair may just be barely on the edge of being dirty and have more suds with your first round of shampoo.

With the conditioner, do as you normally would. gently squeeze the water from your hair and apply the conditioner to the bottom half of your hair. Let it sit as long as you can, then rinse.
