

The six Rs of sustainability

there are many different ways we can help the Earth

REFUSE - to say no

try to refuse disposable and single-use plastics

REDUCE - to lessen

use less, buy less, and avoid waste

REUSE - to use again

use things more than once, use cloth shopping bags, repair, regift

RECYCLE - to change waste into a usable material again

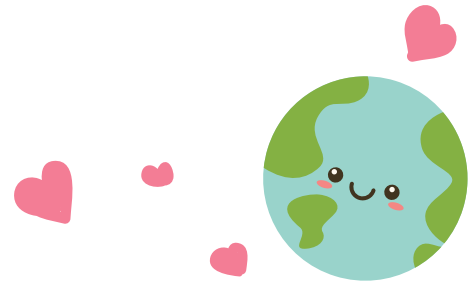

separate waste responsibly so that recyclable products can be transformed into something new

REPAIR - to make something new, fresh, or strong again

fix it instead of throwing it away

ROT - to compost organic waste

compost waste like food scraps and grass clippings to help the soil

Can you list a few ways you can use the 6 Rs of sustainability?

1 way I can refuse:

1 way I can reduce:

3 items I can recycle:

2 items I can reuse:
