

Sizing Chart

This chart is intended to assist you in finding the best possible fit. See Kai Run shoes are engineered to meet the different ages and stages of childrens' foot development.

Since little feet grow quickly, this chart has accommodated for growing room.

Please be sure to print at 100% scale.
Do not scale or resize.
Place a credit/debit card inside this box to verify that the scale is correct.

How to measure:

Step 1: Fold paper on dotted line and set against a wall, preferably on a hard and flat surface. The fold should be at a 90° angle for the most accurate measurement.

Step 2: Place your kids' heel against the paper fold against the wall. Measure both feet and mark the end of the longest toe to determine size.

Other tips:

Measure with socks on if the child intends to wear them with shoes. If the child's foot measures in between lines, move up to the next available size.
