

Loewe bild 4 — OLED

LOEWE.

Switch on, feel good and immerse yourself in the action. The bild 4 is amazing. OLED takes television into a whole new dimension with explosive colours and high levels of contrast for vibrant natural pictures, even in fast paced action scenes. Want to experience the drama of a football match right from the touchline? Or to watch a crime thriller in complete darkness and still make out every detail? OLED takes you from the front row to the heart of the action.

Design

The piano black soundbar, covered with matching acoustic fabric and minimalist black metal table stand are inspired by the extreme darkness of OLED black. The ultra slim display, accentuated by a fine contrasting graphite grey frame and Loewe Eye, creates an impression of elegance and lightness. All part of our bild 4.55 OLED set which includes table stand and integrated soundbar. Simple to set up and easy to operate.

OLED – spectacular pictures

At just 4.9 millimetres, the latest generation OLED screens are thinner than most smartphones. In contrast to LCDs, OLED displays do not require back lighting, each and every pixel produces its own light and so when the pixels are switched off, the result is an intense and complete blackness. The absolute black makes colours look more brilliant than ever and with higher levels of contrast even the finest nuances of night scenes are conveyed in extraordinary natural detail. Add high dynamic range (HDR) technology including HDR10, HLG and Dolby Vision™, and the bild 4 produces images that are even more brilliant than ever before with a whole new level of depth and an amazing colour spectrum for an even more true-to-life reproduction.

Loewe Dual Channel technology

Record one programme while watching another at the same time. It couldn't be easier. Simply connect an external hard drive, for example the Loewe DR+ Feature Disk, to the USB port and start recording. You can even briefly interrupt your viewing. Just press the pause button and then continue watching again where you left off.

Sound

The powerful 80 watt stereo soundbar with a closed bass reflex box ensures warm low frequencies and wonderfully voluminous sound. For a more dramatic and powerful soundtrack its exceptionally simple to expand the audio system thanks to the integrated 5.1 audio decoder. Simply connect the bild 4 TV to the klang 1 subwoofer and a pair of klang 1 speakers for a 3.1 sound concept. Add another klang 1 subwoofer and a second pair of klang 1 speakers to scale up to a 5.2 sound system for well-balanced full surround sound. You can play music from your smartphone through the TV audio system via Bluetooth and of course also enjoy the vibrantly nuanced TV sound wirelessly using Bluetooth headphones.

Operation

User-friendly and intuitive. Clearly structured and a joy to use. Store your favourite TV channels, recordings, apps or external sources on the customisable home screen. There are also useful features to help you manage live TV, including a timeline showing the precise viewing point in the programme. Tidal opens up access to over 40 million music tracks and you can find films and TV series in online video libraries such as Amazon Video, Maxdome, BBC iPlayer and YouTube using apps preinstalled on your set. To make life even easier you can start recording, change channels and easily select your favourite films from the programme guide using the Loewe app, available to download for smartphones or tablets.

Loewe os – operating system

The clearly structured home screen makes it even easier to access and manage your favourite channels, connected devices and recordings.

The beautifully simplified EPG design allows you to see what's on TV and to set recordings with ease.

Never miss a thing with the Loewe app: record documentaries or movies remotely with a single click. Stream live television over the same wifi network to view in another room.

Loewe bild 4.55 OLED set:
Unpack. Switch on. Feel good.

The bild 4 is extremely simple to set up
and a joy to operate.

An ultra-slim 4.9 millimetre OLED display, accentuated
by an elegant graphite grey frame.
