## Unfinished Projects

- Any project you have started and cannot seem to finish!
- Tools and materials will depend on the project your brought with you.

NOTE: This is not a technique driven workshop and we will not be going over any one specific technique. If you need a quick refresher to get you back on track that is what this class is here for. If you completely forget how to do something, I would recommend taking the class again or scheduling a private lesson. The focus of this class is to finish all of those unfinished projects! If you are stuck in the middle and can't remember how to continue this class is for you!
