Adjusting the Packing Seal Assembly

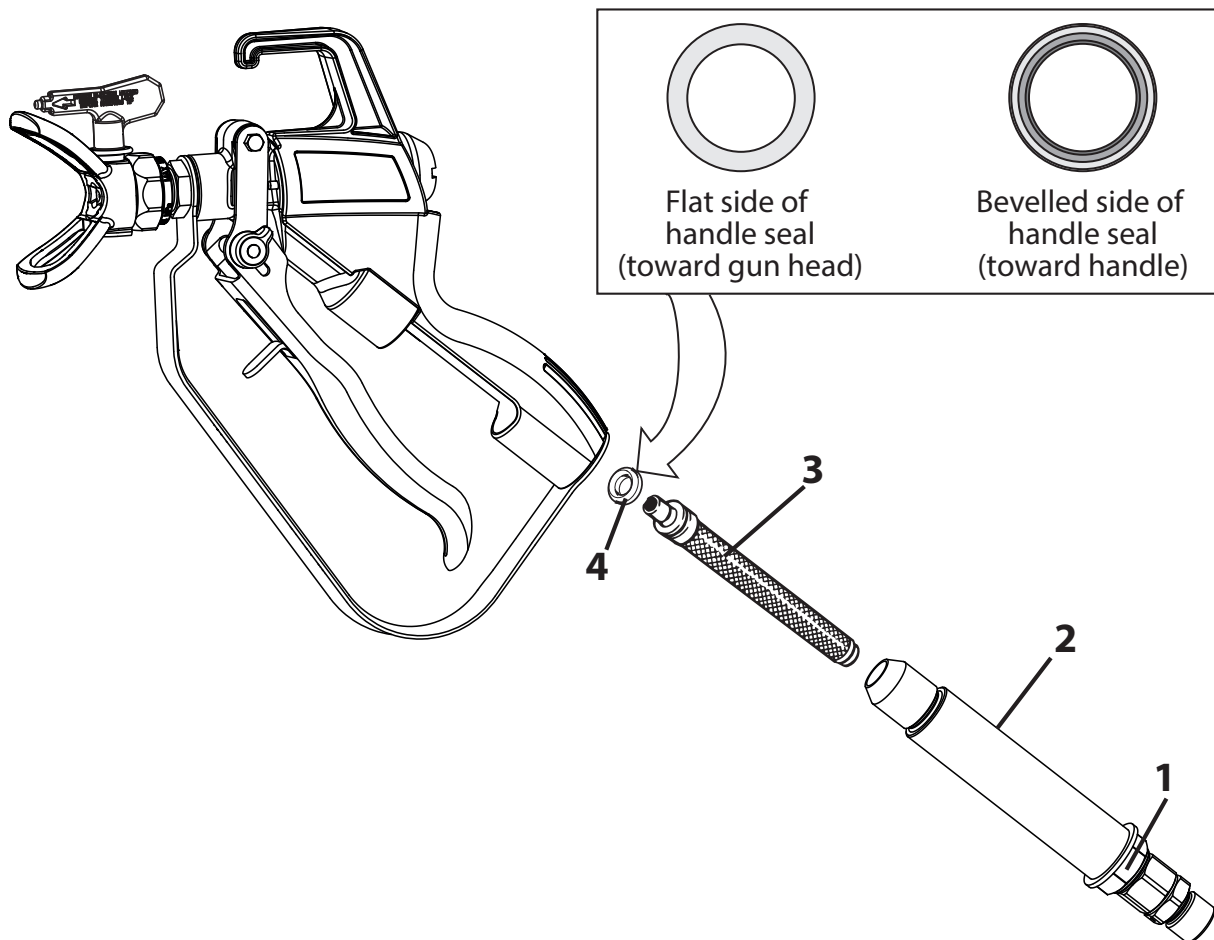

There is a hole in the cap (1). If coating medium is discharged from this hole, the packing requires adjustment

1. Unscrew the cap (1) with a flat head screw driver, then remove the spring (2).
 2. Use box spanner 10 mm socket wrench to turn the pressure plate a quarter turn to the right.
 3. Replace the spring (2) and tighten the cap (1) as far as the stop.
- If the problem persists, please consult your Titan service center.

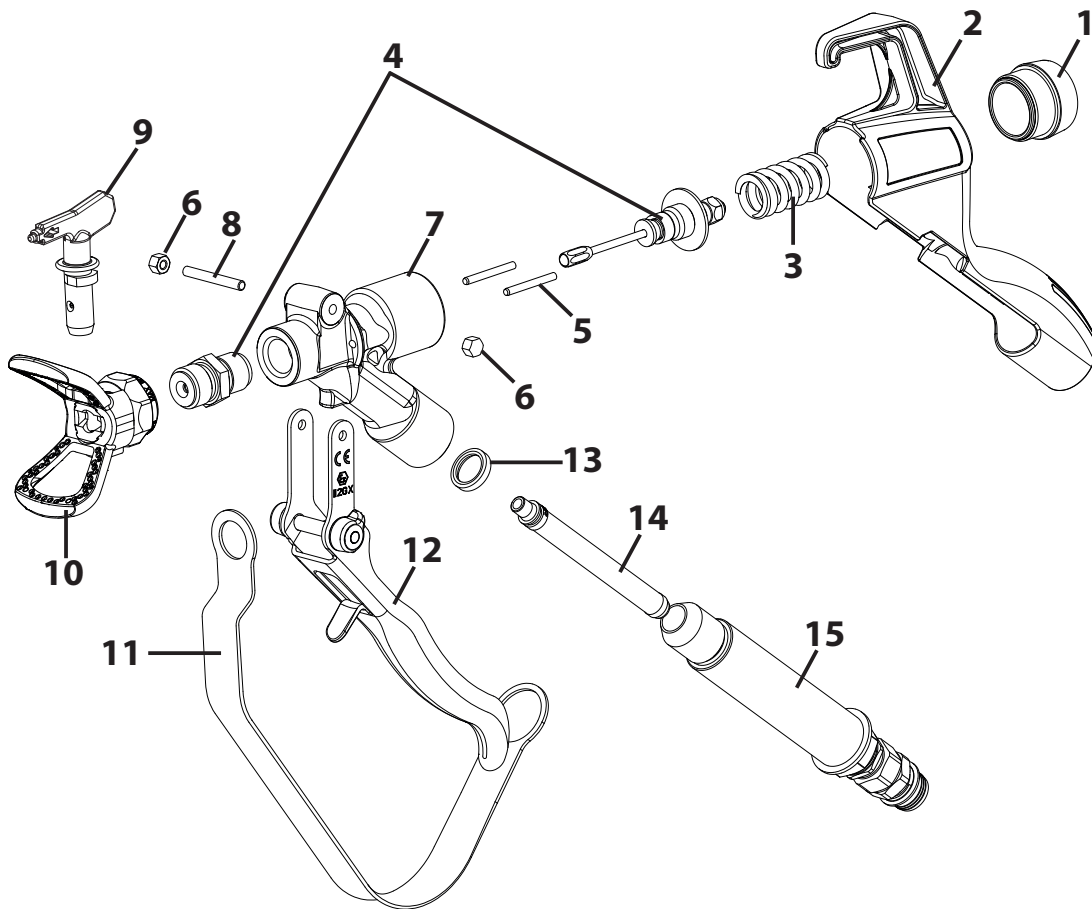

Replacing/Removing the Filter

1. Loosen the fitting (1) with a wrench and pull the filter housing (2) and filter (3) out of the gun.
2. Take the old filter out of the filter housing.
3. Insert the new filter, with the narrow end facing upwards, into the filter housing.
4. Place the handle seal into the gun head with the flat side of the seal toward the gun head.
5. Insert the filter housing (3) back into the gun and screw it securely into place.

Spare parts list

Item	Part #	Description
1	0335301 2339659	Cap (3600 PSI, 250 bar) Cap (7700 PSI, 530 bar)
