

DasMikro I.C.S. USB Adaptor HS For Kyosho Mini-Z

Description:

The USB Adapter HS lets you connect a PC or Android phone (need OTG to USB converter) to the I.C.S. plug on your MINI-Z, and allows you to adjust various setting parameters. It supports the latest EVO chassis (only PC software available) and all previous Mini-z chassis (both PC software and Android app available). It also could be used to upgrade transmitters like EX-6, EX-6R, EX-1, EX-2, EX-RR.

For KO PROPO transmitter/ESC/SERVO settings, you could download software from:

The Future of R/C

The integration of the PC into the R/C world was bound to happen, we just decided to do it first. The EX-10 Helios, PDS programmable servo, and VFS were just the first product to benefit from the ICS system.

The leader in R/C technology. The ICS opens new doors to the R/C industry and the end user. Customizable setting that you can save to your PC and for your viewing. The number of models and setting are endless (depends on how much hard disk space is available). Download the program and try them for yourself. You will see why we are the industry leader in technology. Just click on the icon below to start downloading. You will still require the PC interface to use these programs with our products.
