INSPIRING PAINTS

SEA SALT FIZZ

# Autentico **SEA SALT FIZZ**

is a part of  
the creative  
powder range

It consists of a powder that when mixed with any colour of Autentico Vintage-creates stunning craters of paint leaving a very special finish.

**SEA SALT FIZZ** can be used indoors on walls or on furniture, lamp bases and such items.

# How do I apply it?

SEA SALT FIZZ consists of a mixture of 25-30% citric acid.

This is slightly irritating, especially when in contact with eyes. **Therefore we recommend wearing safety goggles and gloves when working with SEA SALT FIZZ.**

Mix 10-30% SEA SALT FIZZ to your volume part of Autentico Vintage. Do not add too much SEA SALT FIZZ to avoid lumps.

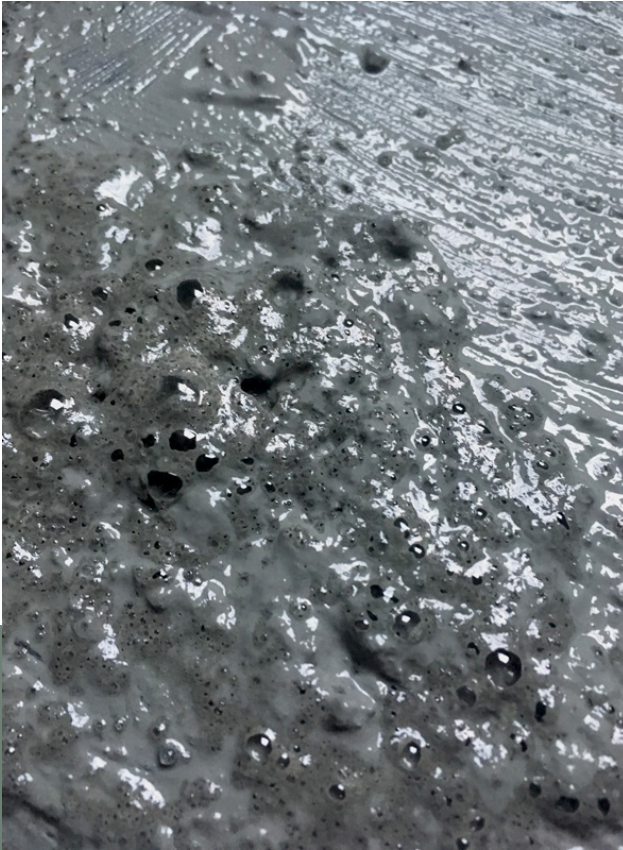

Apply by brush on to the surface. The mixture will continue to fizzle to create paint craters.

Use your imagination to create cool patches of different colours.

You can add SEA SALT FIZZ to other mixtures of Creative Powders especially RUST IN A JAR to create a rough rusted surface.

*Mixture starts fizzling*

*Mixture fizzes and  
forms paint craters  
on surface*

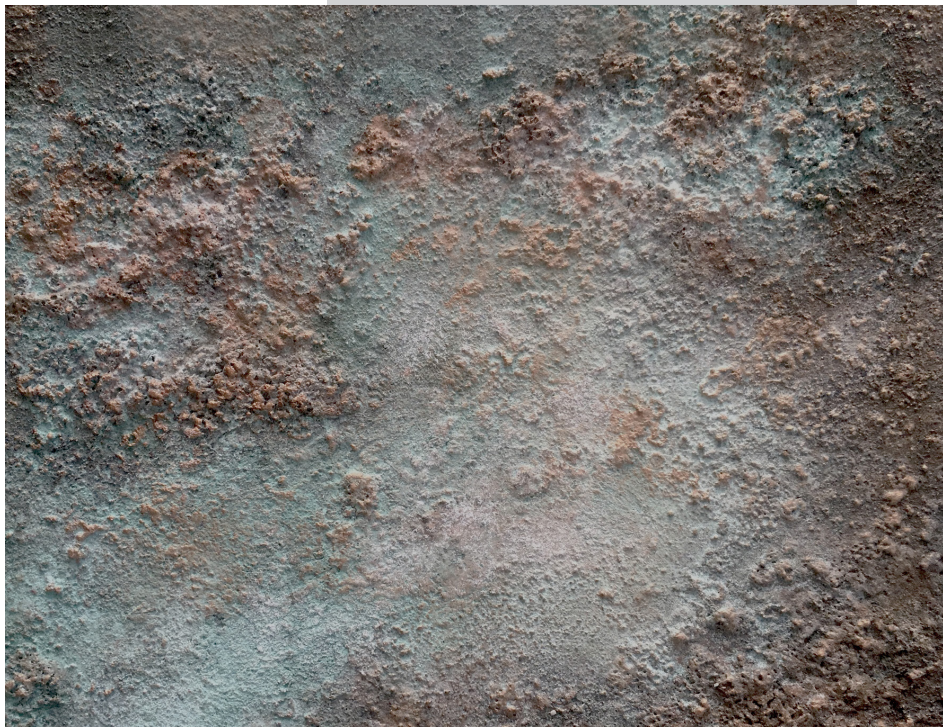

*SEA SALT FIZZ  
drying and showing  
paint craters*

*SEA SALT FIZZ*  
*dried and cured*

*SEA SALT FIZZ*  
*in combination with*
