INSPIRING PAINTS

ROUGH ROCK

# Autentico **ROUGH ROCK** is a part of the creative powder range

It consists of a powder that when mixed with any colour of Autentico Vintage creates stunning faux stone finishes.

ROUGH ROCK can be used indoors on walls or on furniture, lamp bases and such items.

*Candle holders  
"rough rock"*

# How do I apply it?

Paint the surface with Autentico Vintage. This can be the same opposite tone to the colour used in the next step. Let dry.

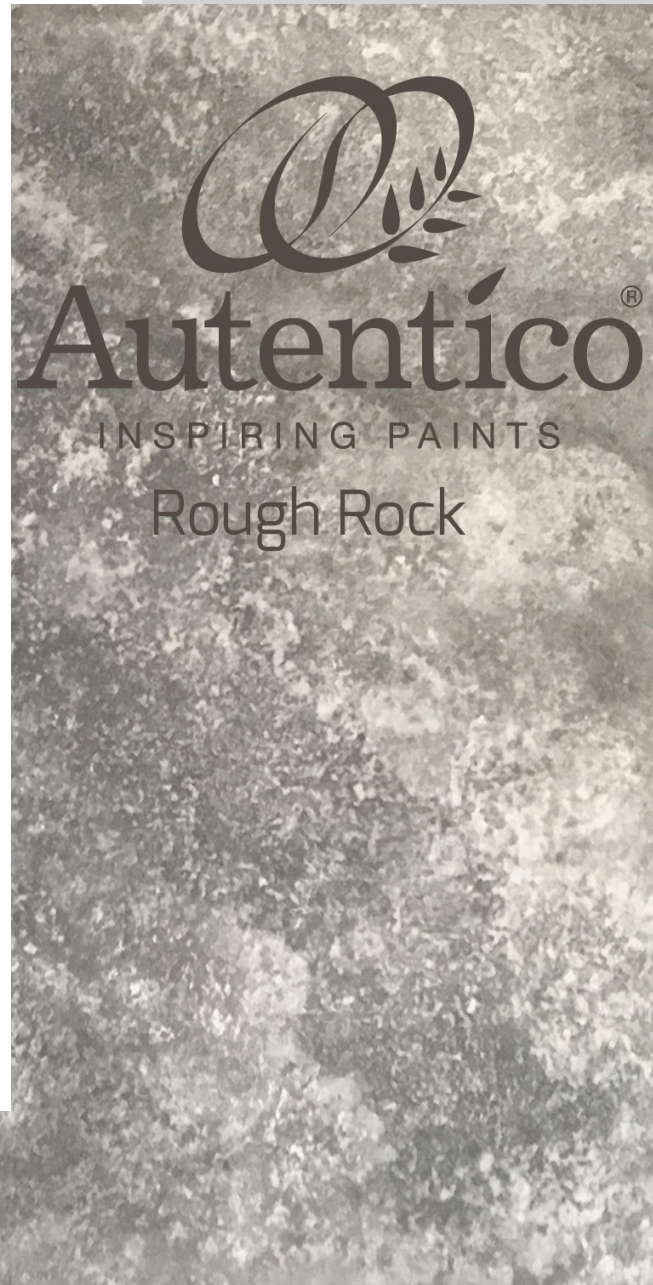

## Next Step

Mix 1 part ROUGH ROCK to 1 part of Autentico Vintage. You can add water if the mixture is too thick. Paint mixture on to the surface and let dry. Sand down high peaks if needed. Let dry for 24 hours. The result will be a truly unique stone finish.

Use your imagination to create cool patches of different colours.

ROUGH ROCK is great to use to create a textured stone finish prior to application of other techniques.
