

◆ Straw Wattle Product Data and Specifications ◆

Product Description:

US Erosion manufactures Straw Wattles in addition to a full line of Erosion Control and Landscape Products. Straw wattles consist of a superior synthetic photodegradable netting engineered for high water flow that is filled with a 100% weed free straw matrix. Straw wattles are made to filter sediment flow in channels and slopes. The wattles are made to conform to the surface of the soil and are secured by staking. Straw Wattles can be custom made to meet specific job conditions.

Specifications:

Each Straw Log is manufactured to the specifications listed below conforming to US Erosion's quality control guidelines. Table 1 provides log dimensions and table 2 provides product characteristics and dimensions.

TABLE 1

DIAMETER X LENGTH	UNIT WEIGHT* LBS	LBS/LIN. FT*
9" X 10'	16	1.7
9" X 15'	25.5	1.7
9" X 25'	42.5	1.7
12" X 10'	25	2.5
12" X 20'	50	2.5
20" X 10'	35	3.5
20" X 20'	70	3.5

*BASED ON MEASUREMENTS AT TIME OF MANUFACTURE

TABLE 2

CHARACTERISTICS	DIMENSION
Fiber Composition	Weed Free Straw
Netting	0.50" X 0.50" HD Synthetic
Configuration	Cylindrical with closed ends

All materials manufactured in America.
