Specification Sheet

Product Name: **Bermuda Grass, Unhulled Seeds**

Description: Common Bermuda Grass is a warm season, perennial grass known for its versatility and persistence in both pasture and turf. Plant unhulled seed any time of the year, but it will not germinate until soil temperatures reach at least 65 degrees.

Uses:

Erosion control seed varieties for grassing, berm seeding, slope retention, soil stabilization, lakeside seeding, golf course seeding, athletic fields, and home lawns.

- Product Name: **Unhulled Bermuda Grass**
 - Variety: **Bargusto**
 - Pure Seed: **99.63%**
 - Weed Seed: **00.00%**
 - Inert Matter: **00.37%**
 - Germination: **90.00%**
 - Noxious Weed Seed: **None Found**
 - Date Tested: **01/24**
 - In TX. Sell by: **10/24**
 - Origin: **Oregon**
 - AMS 480
 - Net Wt.: **50 lbs.**
-
