

Ski Technician - Full Time

32-40 hours/week, Saturday availability required. A typical shift is 8 hours with a 30 minute lunch break, 4-5 days a week. \$10-20/hr appropriate for experience.

You're a friendly & motivated person with at least 2 seasons as a professional ski tech. If you ski, bike & obsess about your gear then you will be a perfect fit. When the task is done if you ask what's next, your new colleagues will appreciate your work ethic. You get that in a retail environment you are part of a team & we all help each other out. You understand that we are all in this together because of our passion for our sport, gear, & our ability to help people get outside to play. You lead a healthy & active lifestyle.

Required skills/knowledge:

- You can sharpen a Ski & Snowboard edge with a surgeon's precision
- You can stone grind a base smoother than a baby's bottom
- You know what "structure" is
- Hand waxing & polishing almost feels like an art form to you
- You competently mount & remount ski bindings
- You understand that ASTM testing ski bindings is about the safety of our neighbors, families & friends
- You know how to use the Vermont Ski Safety device. This is not a dealbreaker if you have not used one before. However, you must have working knowledge of how to set & test bindings, or have used a Wintersteiger Safetronic or similar equipment
- Understand compatibility between bindings & ski boot standards & indemnification of bindings

If you have a mechanical background and are willing to learn, we'd still love to speak with you!
