Fort Scott Munitions (FSM®) 300 Blackout Subsonic TUI™ ammo is match grade rifle ammunition that is designed to be exceptionally accurate. With the use of a suppresser, this ammo is going to have a quiet performance. Designed with military grade hard primers. Our #1 priority is for the safety of our customers. Slam fire is a slim-chance but we have experienced this in our testing.

A Suppressors Impact

With the use of a suppressor, your firearm will see dramatically reduce noise and recoil. This round will cycle with and without a suppressor but we highly recommend using one. It will also cycle without gun manipulation and will work in most builds. When using a suppressor, we have found this to be one of the quietest functioning rounds. Fort Scott Munitions™ is a class 3 dealer and can take care of all your suppressor needs.

Precise Performance

This powerful subsonic round gives you exceptional accuracy. We have tested this round at 50 yards and found it to have tighter than a 2-inch grouping and we have had customers successfully shoot an 8-inch steel plate at 200 yards which proves this round is also reliable for hunting.

Home Defense

Our 300 Blackout Subsonic TUI™ ammunition is a great home defense round. It is designed for shorter distances but has great power. In a confined area and at close quarters, this round is safe and effective for home security and law enforcement since it begins to lose momentum, so it is less likely to cause harm to the surrounding or bystanders.
