# MARCH SHIPMENT

Two shipments full to the brim with tableware have set sail from Japan and are due to arrive in Melbourne from mid-March.

Highlights include the long-awaited arrival of large dinner-sized plates, as well as an array of colours in our ever popular lopsided mugs. Glassware is also on board, with 10 designs back in stock.

22 new items will also arrive that will be photographed and added to our website asap after landing. These include udon bowls, round plates and rectangular plates in our popular 'Fade' range of glazes.

Added to all of that is the usual fantastic assortment of tableware that you've come to expect from MIJ, in a variety of colours, shapes and glazes unique and exclusive to us - and which we are always happy to offer to our loyal customer base... Enjoy!

## OKUNOTO HIBACHI

MEDIUM SIZE / 54CM L 23CM W 20CM H

This Japanese Hibachi grill (or Konro) is made of a special insulating material - diatomite - that helps reflect heat back into the grill to maintain a consistent temperature. These insulating properties lower the heat emitted during cooking, and combined with the 5cm thick walls of the hibachi, aid in keeping the exterior relatively cool.

The diatomite (fossilised plankton) used in the manufacture of these hibachi is sourced from the Noto peninsula in Ishikawa prefecture. It is traditionally mined by hand. It is then formed into blocks which are joined together without the use of mortar for a stronger, tighter and more fire-resistant finish. The hibachi are then baked at 1,000°C for six hours, making them extremely durable.
