barkman™

Spaces at Home

2021

A Canadian legacy.
A family heritage.

In 1948, my father, Peter Barkman, along with his two brothers started a hardware store in Steinbach, Manitoba, with the simple hope of making a living. While providing poured-in-place concrete septic tanks, the brothers saw an opportunity to improve upon the design and invented a precast concrete tank that streamlined the production process. Realizing the benefits of precast concrete, the company soon began manufacturing precast steps and was among the first to bring in segmental concrete pavers to North America.

Innovation still makes up the fabric of Barkman's culture and drives us to constantly improve our products, processes and capabilities every day. For over 70 years, innovation has allowed us to grow as a Canadian family business and has brought us from our humble beginnings to where we are today.

Now, as Barkman transitions into the third generation of family ownership, I am confident that we are well equipped to continue serving you by creating concrete solutions.

Alan Barkman
Chief Executive Officer

GET INSPIRED

Using colour, texture and scale as our bedrock design tenets, our product lines can express any aesthetic you're able to imagine.

From classic to ultra-modern, we invite you to explore our limitless options, all built to help you craft the outdoor living space of your dreams.

COLOUR

Your space deserves
our full spectrum of colours.

From rich creams and pleasing neutrals to various shades of greys and vibrant hues,
Barkman offers a wide selection of colours to suit any outdoor space. Our standard colours
can be special ordered in all paving stone sizes and styles with custom colours available
upon request and minimum orders. Let us help you showcase your style as you make
your living space your own.

TEXTURE

We've got texture for days,
and reliability for decades.

Texture is an integral part of nature, and should be a key consideration in
creating your outdoor living space. Whether you're looking to create a striking
contrast or adapt a more unified approach, our palette of unique textures will
ensure a welcome complement to your space.

SCALE

From big statements to tiny details one size never fits all.

Scale and proportion are critical design principles, and cannot be overlooked when creating an outdoor living space. The possibilities are endless, and our array of sizes and shapes make it possible to create the perfect size relationship to suit your space.

Bringing it all together.

Whether you're undertaking a DIY project or a top-to-bottom landscape installation, Barkman products are engineered to breathe life in to every outdoor living space. The range and depth of our product lines ensures your vision can be fully expressed at every touchpoint.

Make a big first impression, it's the only way to roll

Your driveway creates a vital first impression of your home, setting the aesthetic tone for the rest of your property. While exceptional design is critical, our pavers are also engineered to easily withstand the rigours of automotive traffic and Canada's extreme climate fluctuations.

▲ Broadway 100mm Pavers (page 61)
◄ Mesa Flagstone Pavers (page 59)

Navarro Pavers (page 60)

Watch your weight:

For driveway applications, be sure to choose a paver that is rated for vehicular use.

Broadway 100mm Pavers (page 61)

Design Tip: Interlock for stability

An interlocking design can create additional
strength to support a visually compelling style.

Top to bottom, we build it better:
From edging to pavers and polymeric sand,
Barkman truly offers a total driveway solution.

Take it up a level,
at every level

A well-designed patio is a tribute to the joy of outdoor living. Large or small, Barkman Patios can complement any space to create the ultimate entertaining area for family and friends. Our vast selection of pavers and slabs ensures timeless style paired with lasting durability.

Actual colours may vary.

Design Tip:
Look in the right direction

Use your pathway as a way to direct sightlines to points of interest throughout your space.

A style to suit your tastes

From linear to organic, solid to divided,
our pavers and slabs offer countless choices
for creating the ideal path for your space.

**Design Tip:
Keep the focus**

Your pool is the focal
point of your space.
Be sure to plan your
layout to accentuate
it as the central
element.

Construction Tip:
Know your limits

Pools decks are inherently complex in their construction. Be sure to consult an expert before starting your project.

Live on the edge

Our Bullnose paver is the perfect complement to add functionality and style to your pool deck.

Outdoor Kitchens

Move the party outside and create a space that's perfect for cooking and entertaining. Whether you are updating an existing property, or creating something completely new, Barkman Outdoor Kitchen Kits are tailored to suit spaces both large and small. Our kits can be updated over time to add features as your taste and budget evolve.

▲ Quarry Stone Curved Bar (page 105), Quarry Stone Grill Base (grill head not included in kit) (page 102), Quarry Stone Corner Unit (page 104), Quarry Stone Fridge Surround (fridge unit not included in kit) (page 103), Quarry Stone End Unit (page 104) and Roman Pavers (page 53)

◄ The Quarry Stone Rocket Stove (page 101) has a highly efficient small combustion stove with an intelligent design that makes use of any small fuel source such as twigs and small branches.

◄ Quarry Stone Compact Pizza Oven (page 100), Quarry Stone End Units (page 104), Quarry Stone Bar Counter (page 103), Quarry Stone End Units (page 104) with Extended Countertops and Broadway 65mm Pavers (page 56)

More Ideas at BarkmanConcrete.com Actual colours may vary.
Planning Tip: Bring your kitchen outdoors

Kitchens are the heart of the home, a place where everyone gathers and mingles. Achieve the same appeal outdoors by expanding your living space and breathing new life into your backyard.

Quarry Stone Wood Grill (page 101) surrounded by Quarry Stone Storage Units (page 105) on both sides

The Quarry Stone Wood Grill (page 101) provides a camping cooking experience in your own backyard. It comes with a food grade stainless steel top so you can grill with ease and a spark arrestor which provides easy grill access.

▶ Two Quarry Stone Grill Surrounds (grill unit not included in kit) (page 102), Quarry Stone Corner Unit (page 104), Quarry Stone Bar Counter (page 103), Quarry Stone End Unit (page 104) and Arborwood Slabs (page 65)

Small
Spaces

Start small, start something spectacular

We know that each space is as unique as the people who spend time in it. We created Small Spaces for first time homeowners, those on a limited project budget, or a small, urban backyard. Fashion a fantastic backyard that fits your life, exactly as you live it right now.

◄ Brookside Slabs (page 67)

Make it yours, down to the last detail

Add a personal touch to your space with a Barkman planter, available in many contemporary styles, sizes, and colours to suit your taste. Our Barkman benches have also been designed to meticulous standards so that you don't have to sit on ordinary, but on luxury.

▲ Cast Bench, Bridgewood Slabs (page 66), Quarry Stone Walls (page 83)

▲ Hexagon Wall Units
◤ Cast Planter Round
Planning Tip: Invest in the best

Precast concrete planters and benches for your home are a solid investment. They are one of the most durable and longest lasting type of outdoor furniture available, even lasting decades.

Base & Footing

Gator Base

Building a patio is hard work and one often overlooked piece is preparing the base.

For a light pedestrian patio, we recommend using 4-6 inches for your gravel base and one inch of sand. That's a total excavation depth of 5–7 inches just for your base, never mind the paver height on top of that. However with using Gator base, you can place one inch of sand on your leveled native soil and place your Gator base on top, removing so much extra work.

Footing Pads

Finishing

Polymeric Sand

Polybind Complete G2 is made with a state-of-the-art manufacturing process. Specifically, calibrated sand is mixed with sophisticated intelligent polymers.

This new generation of Intelligent Polymers neutralizes haze and dust. The polymeric sand application is now dust free and haze free. No blower is needed and the intelligent polymeric sand requires only one watering. Polybind Complete G2 is recommended for a variety of uses including pool decks, patios, footpaths, driveways, parking spaces, pavements, etc. Available in Nevada Tan, Oxford Grey, Ivory White and Jet Black.

Snap Edge®

Snap Edge's unique "Snip & Flex" feature allows total freedom when designing your driveway or sidewalk. You can create unlimited curves and angles in minutes, ensuring an aesthetically pleasing and structurally superior project. This flexibility and strength has made Snap Edge® the premier edging choice of professionals.

Landscape Kits

Barkman Certified Accessories

A great hardscape begins with proper installation. That's why we recommend and supply Barkman certified accessories like Alliance polymeric sand products and Snap Edge to protect your Barkman investment. Use Snap Edge to create unlimited curves and angles in minutes, ensuring an aesthetically pleasing and structurally superior landscape project.
For more details, download the *Barkman 2021 Specifications Guide* at BarkmanConcrete.com.

The Environment

At Barkman we are committed to being good stewards of the planet. Not only are our products excellent choices for people concerned about the environment, we employ environmental best practices throughout our manufacturing and operations whenever possible.

Quality and Support Pledge

All Barkman products are guaranteed to meet or exceed the Canadian Standards Association (CSA) standards. We use only superior grade materials and employ stringent quality control measures throughout the manufacturing process to ensure a quality product every time. We also support our products with one of the industry's largest network of dealers and contractors. When you need us, we'll be there to help.

Transferable Lifetime Warranty

Barkman Concrete warrants the structural integrity of our paving stone, slabs and retaining wall units. For homeowners, we offer a transferable lifetime warranty, where we will replace or repair at our option, without charge any defective product installed and maintained to our guidelines under normal use. For more information, please go to our website at BarkmanConcrete.com/about/warranty.

How to Order

Ordering Barkman products is as simple as calling or visiting one of our many dealers or contractors. Visit BarkmanConcrete.com for a full list of dealers and to find one in your area. Please be ready to specify product style and colour choice if required. If working directly with a contractor, please be sure to specify Barkman products to ensure Barkman quality. For Winnipeg customers requiring steps, please contact our Winnipeg office directly. Note that all specifications in the product catalogue are nominal.

Actual Colours May Vary

Every effort has been made to ensure accuracy in the colour representations found in this product catalogue. However, due to the natural characteristics of concrete, the manufacturing process and print reproduction, actual colours in the final product may vary from that shown.

Installation and Project Estimation Support
Barkman provides easy-to-read installation guides that contain simple step-by-step instructions to help make installation a snap. Visit BarkmanConcrete.com to download a copy. Our website also features a project calculator that allows you to easily estimate the quantity of Barkman material and accessories you will need for your project.

Barkman Concrete Limited is a proud member of the Interlocking Concrete Pavement Institute.

icpi
Interlocking Concrete
Pavement Institute
Barkman products can be installed by the do-it-yourselfer, however a certain degree of landscaping skill is required. These are examples of a basic paver and retaining wall installations to provide you with an idea of the process involved. For more in depth installation guides for specific products, or to find an authorized Barkman installer, visit BarkmanConcrete.com.

Caution: Before any digging, always consult your local utility companies for the location and depth of pipes, cables and conduits. Dry sawing or grinding of concrete products may result in the release of respirable crystalline quartz. Prolonged exposure to respirable crystalline quartz may cause delayed (chronic) lung injury (silicosis). The use of a NIOSH-approved respirator and tight fitting goggles is recommended when sawing or grinding operations are in progress.

Equipment Needed

Broom, concrete saw, guide string, gloves, hammer (0.9–1.4 kg/2–3 lb.), knee pads, pencil, plate compactor, rake, level, wood leveling board (51 x 102 mm, 2.4–3.0 m/2 x 4 in., 8–10 ft. long), leveling guides (two, 25.4 mm/1 in. diameter pipes or wood, 3.0 m/10 ft. long), shovel, spray paint, stakes, tape measure, safety glasses, trowel, wheelbarrow

Getting Started

• Layout design on paper
• Estimate required amount of Barkman product, edge restraint (Barkman Snap Edge recommended), coarse granular base and coarse bedding sand needed (see BarkmanConcrete.com for product calculator)

Ground Preparation

• Transfer design onto the ground at the site using spray paint
• Mark the top of the desired finished surface, using stakes and guide string (**A**) (for minimal slope drainage, 25.4 mm/1 in. of vertical elevation for every 2.4 m/8 ft. of horizontal surface is recommended)
• Excavate ground below the surface guide string line (**B**) to desired depth (see install guides at BarkmanConcrete.com)
• Spread granular base (**C**),

dampen and compact with a plate compactor, 76 mm/3 in. below surface guide string (do not walk on screed sand base)

Installing Pavers

• Install edge restraint (**D**) on starting edge
• Spread 25.4 mm/1 in. layer of bedding sand (**E**), using the leveling boards and leveling guides
• Lay pavers (**F**), keep level to surface guide string and use additional guide string to keep pavers square
• Use concrete saw to cut pavers as needed to fit your design

Finishing

• Install edge restraint on remaining edges
• Sweep coarse sand or polymeric sand into all spaces between pavers, repeat step after 2 days (see instructions on polymeric sand packaging for further details)

Completely Modular Kits

With a wide range of combinations that will fit every backyard size, Barkman's Quarry Stone Outdoor Kitchen kits can be combined with other landscape kits for greater flexibility. They can also work around existing outdoor features, such as an existing stand-alone grill.

Equipment Needed

- Broom, chisel, concrete saw, guide string, gloves, rubber mallet, knee pads, pencil, rake, level, shovel, stakes, tape measure, safety glasses, trowel, wheelbarrow

Getting Started

- Layout design on paper
- Estimate required amount of Barkman product, well-graded granular base, top soil, filter cloth and masonry adhesive needed (see BarkmanConcrete.com for product calculator)

Ground Preparation

- Excavate a trench (**A**) 203–305 mm/8–12 in. deep and 406–610 mm/16–24 in. wide along the entire length of the wall (larger walls require larger trenches – see specific product installation guides for exact details)
- Compact base soil to ensure stability (**B**)
- Lay filter cloth (**C**) under granular base and against the exposed face of the excavation
- Spread 102–152 mm/4–6 in. layer of granular base (**D**), compact
- Position leveling string to mark location of the first course

Installing Units

- Lay first course (**E**) on prepared base (at least 51 mm/2 in. below grade), keep each unit level front to back and side to side
- Place drain tile (**F**) on prepared base, behind the first course
- Sweep top of first course, place next offsetting course (**G**), back fill with granular rock on top of filter cloth Repeat offsetting courses (**H**) and back fill until desired height is reached
- Secure last course (**I**) with adhesive and apply pressure to secure

Finishing

- 152 mm/6 in. from top of wall, pull filter cloth back towards the wall, on top of back fill (**J**)
- Fill remaining space with top soil (**K**) (cover the pulled back filter cloth) to make ground level with wall
- Fill remaining trench space in front of the wall with top soil (**L**) sloping away from the wall
