# GENERAL: HEADER SETTINGS

## Transparent Header

### Enable Transparent Header (Homepage)

When you enable the transparent header your logo and navigation will be directly on top of your headline image. The transparent header will only be used on your homepage.

### Logo Transparent

When you enable the transparent header it's best to upload your logo with a transparent background (often in .png). This logo will *only* be used on the homepage.

### Navigation color

Make sure your navigation color is well visible on your homepage when you use a transparent homepage header.

## Regular Header

The screenshot shows a settings panel on the left and a website header preview on the right. The settings panel includes:

- Back to Settings** link.
- Logo** section: "This is your shop's logo. Recommended dimensions for this image are 100px width X 50px height." Includes a "Browse" button and a note: "PNG/JPEG/GIF/ICO, up to 25MB".
- Background color** section: "This background color only applies if you are not using a transparent header on your homepage." Includes a color picker set to "#FFFFFF".
- Navigation color** section: "This navigation color only applies when you are not using a transparent header on your homepage." Includes a color picker set to "#051356".

The website header preview shows the "BON APPÉTIT" logo, navigation links (FOOD, ABOUT US, MENU, SHOP, CONTACT), and icons for globe, user, and cart. The main content area features a restaurant-themed image with the text "Let's eat Restaurant theme" and "Beautiful & unique websites made easy", along with "View the full menu" and "Order ahead" buttons.

### Regular Header

The regular header will be used throughout your website. When the transparent header for homepage only is disabled, the regular header will also be used on the homepage.

### Logo

Upload your restaurant's logo to be shown in the regular header throughout your website.

### Background color

Pick a background color for your header. When the transparent header is enabled this will not be visible on your homepage.

### Navigation color

Pick a color for your navigation text. When the transparent header is enabled this will not be visible on your homepage.

## Navigation Positions

The screenshot shows a settings panel on the left and two website header preview examples on the right. The settings panel includes:

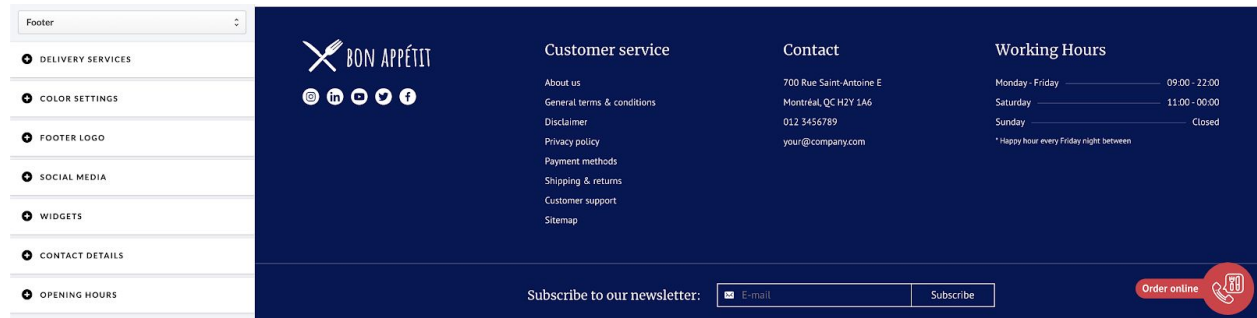

- Back to Settings** link.
- Navigation position** dropdown menu with "Next to logo" selected.

The two preview examples show the "BON APPÉTIT" logo and navigation links (FOOD, ABOUT US, MENU, SHOP, CONTACT) positioned "Next to logo" and "Under logo" respectively.

## Navigation positions

Select how you'd like to show your navigation and logo alignment.

## GENERAL: FOOTER SETTINGS

## Delivery Services

### Order online button color

Pick a color for the Order Online widget hovering on your website at the right bottom.

### Enable / Disable multiple delivery services

Enable delivery services and link to your page you are involved with and want people to order from. When the Order Online widget is clicked, a pop-up will show all delivery services enabled, when a delivery service is clicked your visitor gets navigated to the provided link.

*This theme supports a wide variety of delivery services, can't find the one you are looking for? Please reach out to our support teams.*

Provide your opening hour for Sunday only. This will be displayed on the right side of your footer. If no content is provided this line will not be displayed.

### Opening hours addition

This line will show below your opening hours displayed in your footer. *In example: \* Happy hour every Friday between 20:00 - 21:00.*

## PAGES: HOMEPAGE SETTINGS

### Headline settings

The image shows a settings panel on the left side of a restaurant website homepage. The settings panel includes the following sections:

- Headline image:** A preview of a restaurant interior with a table set for dining. Below the image is the ID number 20200810134304 and links for 'Change' and 'Remove'. The instruction reads: 'Upload a big image that shows on your homepage'.
- Headline title:** A text input field containing 'Beautiful & unique websites made easy'. The instruction reads: 'Enter a title for your headline'.
- Headline text:** A text input field containing 'Let's eat Restaurant theme'. The instruction reads: 'Enter an additional text for your headline'.
- Headline text color:** A color picker showing the hex code #FFFFFF. The instruction reads: 'Pick a text color for the text displayed on top of your headline image'.
- Headline button color:** A color picker showing the hex code #FFFFFF. The instruction reads: 'Choose a color the button displayed on your headline will be shown in.'.
- Headline button text color:** A color picker showing the hex code #051356. The instruction reads: 'Choose a color for the button text displayed on your headline.'.

The website preview on the right features a dark background with a restaurant scene. The navigation menu includes 'FOOD', 'ABOUT US', 'MENU', 'SHOP', and 'CONTACT'. The main headline reads 'Let's eat Restaurant theme' followed by 'Beautiful & unique websites made easy'. Two buttons are visible: 'View the full menu' and 'Order ahead'.

**Headline image**

Upload a big headline image that will show full-width on your homepage.

**Headline title**

Provide a title to be displayed on top of your headline image. When not provided the headline title will not be visible.

### Instagram items amount

Decide how many posts you would like to show on your home-page. When more than 4 the images will go on a second row.

# NAVIGATION MENU: SETTING UP

*These actions need to be handled outside of the edit theme functionality.*

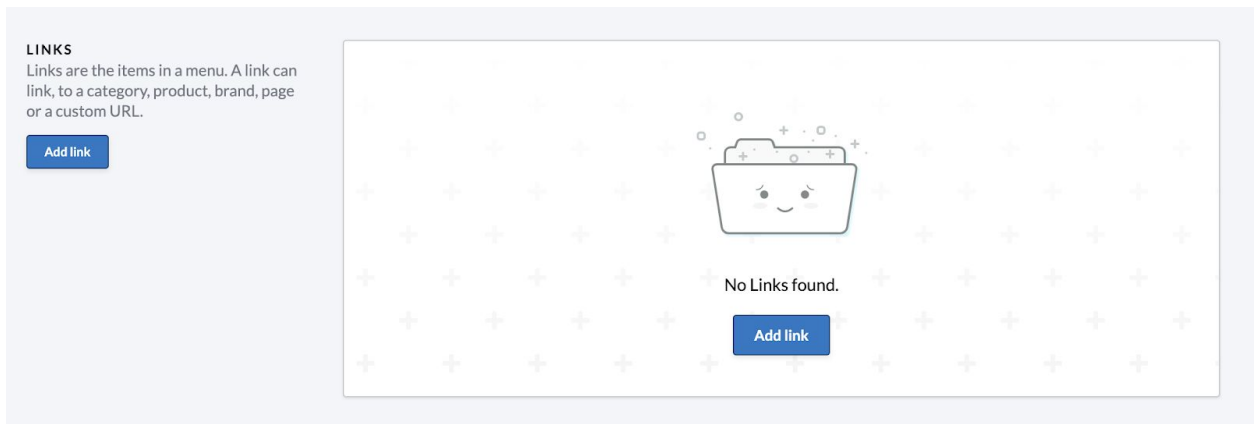

To manage your navigation menu located at the top of your website. Open your Lightspeed eCom back office and navigate to *'Design > Navigation'*.

## Adding a link to your navigation

1. To manage your navigation menu click *default* located at *'Design > Navigation'*.

2. Click 'Add link'.

ENGLISH

Link title

Food Menu

3. Provide a title, this will be directly displayed on your website. In this example we will create and upload our food menu.

Link to

URL

Open link in new window

- Home page
- Brand
- Category
- Product
- Page
- URL

4. Select where you want to link to once the menu item gets clicked. In this example we will use URL. This can be any URL you want your visitors to link to.

Link to

URL

Open link in new window

5. As an example, you can link your visitors to a PDF file of your menu.

*Don't have an online link to your food menu? Make sure you upload it in files. Learn more about uploading files in your eCom back office [here](#).*

6. Save! Your food menu should now be visible on your website!
7. Not happy with the menu item position? You can easily drag and drop them in your preferred order, one resorted the changes will be directly live on your website.

*You can also link to already created categories, brands, pages or products. Learn more about setting these up on the following Lightspeed help articles:*

- [Creating categories](#)
- [Create products](#)
- [Create pages](#)
- [Create brands](#)

*Once set up, easily link to any of these page types by going back to step 4 and selecting a different link to type.*
