

SKOUT AIRGUNS

2025

evo

\$2450

INCLUDES AIR TANK + PLANO® CASE

The EVO is the flagship of the SKOUT AIRGUNS® product line. Using cutting edge technology for every facet of its performance.

The EVO represents a continuous improvement process - driven by results on the range and in competition. Leveraging every technology that SKOUT AIRGUNS® has available -
The EVO is the most advanced airgun ever.

CUTTING EDGE TECHNOLOGY

SKOUT AIRGUNS® are pioneers of the electropneumatic air rifle. SKOUT's valve design and layout eliminate metal on metal wear and drastically reduce recoil.

Hybrid Bull barrel technology combines carbon fiber and alloy construction for factory and aftermarket SKOUT barrels. Leveraging the best possible materials yields minimal weight, maximum vibration dampening and improved accuracy.

VERSATILE + ADAPTABLE

SKOUT AIRGUNS® are available in all popular calibers and capable of using slug or pellet. Barrel options and caliber kits allow the shooter to adapt their SKOUT air rifle to a variety of shooting formats.

EXPANDABLE + CUSTOMIZABLE

SKOUT AIRGUNS® can be purchased as a kit, or a la carte. Choose barrel/caliber, components, storage options - and even accent color.

READY OUT OF THE BOX

SKOUT AIRGUNS® are factory tuned and set for your chosen caliber. Every airgun is shot in and chronographed at our indoor 100 yard range.

EPOCH

EPOCH now comes with SKOUT®'s Hybrid Bull barrel, which improves accuracy and makes the EPOCH compatible with all current barrel offerings.

Air supply has been upgraded with the addition of SKOUT®'s latest On/Off air system.

Weight has been reduced with the use of our skeletonized stock. A reduced MAP makes the EPOCH even more affordable.

\$1999

INCLUDES AIR TANK + PLANO® CASE

COMPACT

SKOUT® introduces the COMPACT version of the EPOCH platform.

An extensively milled upper chassis, shortened 17" barrel system, and light weight optics rail allow the COMPACT to shed weight without compromising accuracy.

A simplified air valve system, and 300ci compact tank round out the COMPACT's base 8lb build. This is the airgun you can take anywhere.

\$1750

INCLUDES 300cc AIR TANK

BENCH REST STOCK

- FITS EVO AND EPOCH -

SKOUT[®] REAR REST

The SKOUT[®] rear rest features micro-adjustable elevation and windage, driven by worm-style gearing. Multiple bubble levels and adjustable feet assure a flat and stable base with ample support.

The SKOUT[®] rear rest elevates the shooting of any airgun platform - SKOUT[®] specific and universal adapters are included.
