

Pool Area:

A common application is to put stone 2ft around an above ground pool. To calculate the stone usage, use the following instructions:

- Use the circular area within the bulk Mulch Calculator (Located under bulk mulch tab)
- Enter pool diameter in feet(P)
 - Using “Small Tree” area
- Enter outer stone diameter in a separate row in feet(O)
 - Using “Medium tree” area
- Number of circles (around pool) = 1
- Enter depth in inches
- Subtract the two calculations
- Get value needed

Raised Bed Boxes:

Another common area to calculate is raised bed boxes. Simply use the instructions below to calculate how many yards are needed:

- Use the rectangular area within the bulk mulch calculator
 - Located under bulk mulch tab
- Enter bed dimensions (W) (L) in feet
- Update the depth (H) in inches
- Calculate value needed
