Technique

Adding flair with a creative toggle clasp.

Step 1 Make the loop on the toggle bar.

- A: Holding the toggle bar securely with your fingers, use the rosary pliers to grip the straight end of the head pin.
 While still holding securely, pull the head pin towards you. Bend it anywhere in between a 45° and a 90° angle.
- **B:** Continue by turning the head pin away from you (*keeping the angle*) until you've completed two full revolutions of a coiled loop, achieving plenty of tension on the toggle bar.

Step 2 Attach the toggle to the bead strand.

- A: Slide the opened jump ring through the coiled loop and your bead strand. Using two pair of chain nose pliers, completely close the jump ring.
- **B:** Slide the opened jump ring through the toggle ring and the opposite end of your beaded strand.
- **C:** Using two pair of chain nose pliers, completely close the jump ring.

Helpful Tips

Be creative with your toggles! Not only are they perfect focals for bracelets, but also for necklaces too.
