

## fit little FEET

For best results your child should be:

- Standing up against a wall on a hard surface
- Distributing full weight equally on both feet

Be sure to measure both feet!

### Print

Print out this sheet and check it for accuracy (see below).

### Find

Have your little one stand on the sheet with the back of their heel lined up on the indicated spot on the curved line. Fold or cut paper to 0" line.

### Measure

Measure both feet. If they're different length, the longer one is your child's shoe size.

1. Print this page on an 8.5" x 11" sheet of paper; ensure page prints to actual size or 100%
2. Place a credit card over this space to check for accuracy
3. If the card fits, the paper size is correct

Please note: this size chart is approximate. Shoe size can vary by brand and we recommend comparing measurements with the size chart of each individual brand.
