

XT Camera

Extraordinary in every way

November 2020

Dedicated to effortless travel photography

The XT Camera emphasizes streamlined image capture, centered around an intuitive touchscreen interface with easy-to-master operation.

Compose, focus and shoot – it's that simple. The first of its kind, the XT is a fully integrated digital field camera supporting medium and large format optics. Shutter and aperture controls are integrated into the touchscreen for intuitive operation with accurate results, while automatic capture modes are available to ensure you are always ready to capture the ideal exposure, no matter the conditions you face.

The XT seamlessly integrates shutter controls without the need for external power, accessories or cables, and incorporates a dual-action shutter button, all of which elevates the field camera ideals into the digital photography world.

The XT includes:

Frame Averaging

An automated tool to achieve the long exposure aesthetic without filters.

Automatic Metering

Aperture Value, Time Value and Program modes - unprecedented in a field camera.

Mobile Integration

Seamless integration between camera and mobile for easy operation.*

Available April 2021

Perspective Correction

Stitching and perspective correction capabilities thanks to built-in 24mm vertical and horizontal shift.

XT - Rodenstock Lenses

HR Digaron-S 23mm f/5.6

The ultra wide-angle of the 23mm is one of the widest possible lenses for full frame medium format. It offers a unique and stunning perspective for a single capture.

HR Digaron-W 32mm f/4

The 32mm offers a large image circle that, coupled with the shift movements of the XT, provide near perfect stitching opportunities for massive scale landscape images.

HR Digaron-S 40mm f/4 Tilt

An essential wide angle lens dedicated to landscape photography with an innovative tilt design, allowing for fine focal plane control, maximizing depth of field.

HR Digaron-W 50mm f/4

The 50mm provides virtually distortion-free results. Combined with its subtle wide angle of view, the shift ability of the XT creates stunning results, with clean and elegant perspective corrections.

HR Digaron-W 70mm f/5.6

With a "normal" angle of view, the 70mm remains close to the perspective of human vision. The compact size and large image circle mean that the 70mm is the perfect accompaniment to a wide-angle lens.

HR Digaron-SW 90mm f/5.6

With a narrow angle of view and a relatively fast aperture, the 90mm provides subject detail at a distance. The ability to isolate subject matter or bring a distant landscape to the forefront uniquely positions the 90mm as a lens one can't do without.

Dedicated Field Workflow

For unencumbered shooting on the go, the XT Camera seamlessly adapts to conditions in the field with simple, intuitive integrations and features.

WiFi

Extend your workflow, flexibility and functionality via Capture One or future Mobile App connected on any device.

Power Management

Always stay powered with the ability to charge the internal battery via a USB-C connected power bank.

IQ Styles

Adopt your own bespoke style settings via IQ Styles, to preview your final aesthetic in the field.

ETTR

Easily capture perfectly exposed images with all the available light in a scene without any set up, ensuring you never miss the shot.
