

PRICING CHART

DEVELOP

FORMAT

- 135 [PRICE PER ROLL]
- 120 [PRICE PER ROLL]
- 4x5 [PRICE FOR 2 SHEETS]

TYPE

- COLOR NEGATIVE [\$12]
- BLACK & WHITE [\$12]
- SLIDE [\$15]

DEV

- STANDARD
- PUSH [\$2 PER STOP]
- PULL [\$2 PER STOP]
- X-46 [\$5]
- BLEACH BYPASS [\$3]
- REMJET REMOVAL [\$3]

SCAN

FILE

- JPEG [\$8]
- TIFF [\$12]
- RAW [\$16]

QUALITY

- LOW [\$2]
- MEDIUM [\$4]
- HIGH [\$6]

EXTRAS

- PRINTS [\$1 PER PRINT + \$7]
- OVERSCAN [\$2]
- CCR [\$5]
- EXP. COR. [\$5]
- COLOR [FREE]
- CONTRAST [FREE]
- FLASH DRIVE [\$10]

All prices are based on 1 roll of 135, 1 roll of 120, or 2 sheets of 4x5. Scanning half frames, or other non-standard exposures, on 135 is a \$5 additional charge. Rolls of 220 are double the price of 120. Print prices are based on 4x6 and 4x4 prints, any specialty sizes will require unique pricing. The COLOR and CONTRAST options come at no additional charge and are for those looking for a particular look from their film.

FILE SIZES

[PER IMAGE]

FOR ANY FILE SIZES OVER 50MB, IT IS RECOMMENDED THAT YOU LEAVE A THUMB DRIVE WITH YOUR FILM DURING DROP-OFF. IF YOU ARE UNABLE TO DO SO, EXPECT SLIGHT DELAYS WHEN ACCESSING YOUR DIGITAL FILES.

All 135 format images are scanned into 20 megapixel images and are then compressed into the corresponding file types and sizes.

135 [20MP]	LOW	MEDIUM	HIGH
JPEG [24-bit Color]	5MB	10MB	30MB
TIFF [48-bit Color]	35MB [8-bit ZIP Compression]	65MB [8-bit No Compression]	100MB [16-bit No Compression]

The values listed below are based on a 6cm x 6cm negative. For 6x7, 6x9, or 6x17, expect larger files. For 6x4.5, expect smaller.

120 [6x6]	LOW [600ppi]	MEDIUM [1200ppi]	HIGH [2400ppi]
JPEG [24-bit Color]	5MB [1.7MP]	20MB [6.7MP]	82MB [27.3MP]
TIFF [48-bit Color]	10MB [1.7MP]	40MB [6.7MP]	165MB [27.3MP]

Due to the large file sizes, for High Resolution scans of large format, we will require a thumb drive with your film during drop off.

4x5	LOW [600ppi]	MEDIUM [1200ppi]	HIGH [2400ppi]
JPEG [24-bit Color]	20MB [6.6MP]	75MB [26.5MP]	300MB [106MP]
TIFF [48-bit Color]	40MB [6.6MP]	160MB [26.5MP]	610MB [106MP]

FAQ's

CAN YOU DEVELOP OLD FILM?

Yes, I can. Older film might have some fading or color shifts, but it usually turns out well. Film stored in cool, dark, and dry places tends to hold up better over time.

WHATS THE AVERAGE TURNAROUND TIME?

It should be ready for pick-up on **Saturday**. Sometimes orders will be ready on Friday, depending on order volume that week.

WHAT FILM FORMATS DO YOU SUPPORT?

I can handle various film formats, including the standard **35mm** (also known as 135), medium format **120 & 220**, and large format **4x5** sheet film. I can even process the less common **APS** film format.

HOW MUCH DO YOUR SERVICES COST?

The price varies based on the services you choose. Generally, a roll will cost between \$22 and \$30, depending on your scan preferences.

WHAT FILE TYPE SHOULD I CHOOSE?

You can choose between JPEG and TIFF. **JPEGs** are smaller and easier to view, while **TIFFs** are larger and suited for editing. I also offer Unconverted RAW file delivery. Great for slide film.

WHAT SCAN QUALITY SHOULD I CHOOSE?

Low Quality is still plenty of resolution for sharing on social media and with friends. These scans are designed primarily for viewing on screens.

If you've ever got a basic scans from labs like Keller's, you'll find that my Low Quality scans are right on par with them.

However, if you're considering making prints in the future, going for **Medium Quality** scans will give you the best results.

For those planning to create large prints or enlargements of their photos, opting for **High Quality** scans is highly recommended. These scans preserve even the finest details.

CAN YOU MAKE PRINTS FROM MY PHOTOS?

Yes, I can print your photos in the classic **4x6** and **4x4** sizes. Please allow one week for turnaround.

WILL I GET MY NEGATIVES BACK?

Absolutely. Your negatives are returned to you upon pick-up.

HOW DO I ACCESS MY DIGITAL FILES?

Remotely, either by **QR Code** or **email**, both options will be including in your order envelope. Alternatively, you can leave a **thumb drive** with your film during drop-off.

CAN YOU DIGITIZE MY PRINTS?

Certainly. any images measuring **8in x 10in** or smaller can be digitized. Refer to the **File Guide's** chart for **4x5 [Large Format]** for file type and scanning options.

CAN YOU FIX OR REPAIR MY PHOTOS?

Yes, we provide **Color Cast Removal** and **Exposure Correction** services. These can be helpful for vintage or poorly exposed images.
