Electrical - 12v - 240v

Camec carries a huge range of Electrical products to suit most RV applications. Our range of Solar Panels only consists of "A Grade" panels and we back this up with a 25 Year warranty on the Solar Cells and an industry-leading 5 year warranty on housings and importantly accessories like solar regulators and anallary products. To compliment our solar range, we have also introduced a quality AGM battery – again with an industry leading warranty.

Of course we also carry a large range of lighting, with Exclusive Australian distribution of Lumo products, plus many other ranges and brands to choose from – including Camec's own LED replacement globes and our quality grab handles which are one of the most popular products in the industry. To compliment these products, we also have a wide range of inverters, wire, switches and cable.

We also have a large range of 240V products – from power points & switches, to extension cords, Ampfibian 15A to 10A adaptors and chargers. Our range is continually expanding so make sure you check out our website for the latest products.
