**LED High Definition TVs featuring an inbuilt DVD player and exclusive 12V, 24V or 240V operation. Can be wall mounted or stand mounted for flexible use in or out of the RV. These TVs are designed for RV use and have added protection against Australia's environmental extremes such as humidity and salt air. This is backed up by a National 2-year warranty.**

### USB PVR & MEDIA PLAYER

By connecting a portable USB thumb drive or hard drive to these TVs, you can record shows on digital TV (PVR function) plus pause & replay live TV (Time Shift). The features don't stop there! You can also play movies and TV shows from USB (using popular formats e.g. AVI, MP4 etc) plus listen to your favourite MP3 or WMA music tracks, view photos using the inbuilt photo viewer or even text (.txt) files.

### INBUILT DVD PLAYER

Watching movies couldn't be easier using RV Media's inbuilt DVD player. Not only can you watch DVDs, you can also listen to audio CDs. Both the TV and DVD functions are controlled conveniently by the same remote control. RV Media TVs also feature Co-axial digital output for optional connection to surround sound systems and a headphone output so you can watch movies without disturbing others.

### 12/24/240V OPERATION

Included with these televisions are a 2 metre 12/24V accessory plug power adaptor. This allows connection in most vehicles and ensures that RV Media TVs can easily cope with the voltage fluctuations found in today's modern caravans & RVs using a combination of batteries, chargers and solar. A 240V power supply is also included making these TVs also ideal for use at home or utilising the RVs 240V supply.

### QT - DIRECT QUICK TV TUNE BUTTON

When travelling, it is advisable to re-tune your digital TV channels (DTV) when visiting a new town or area to ensure you are receiving all of the available TV and radio channels. This is now made easier with RV Media's QT button. When you need to re-tune your DTV channels, all you need to do is press the dedicated QT button directly on the remote control to start the DTV auto tune function without having to wade through menus to find it!

### ADDITIONAL FEATURES

- Super slim and light design.
- Long range HD DVB-T digital TV tuner.
- USB PVR function with Time Shift.

- Co-axial digital and headphone output.
- USB multimedia playback.
- Quicktune TV auto tune button on remote.

**Designed specifically for the RV Industry, RV Media by Camec TV Brackets feature the ultimate combination of functions ideal for all RV requirements.**

**FEATURES:**

- Bracket is removable from the mounting base (to allow the bracket to be used on another mounting base in or outside the RV).
- Bracket head is removable to allow easy stowage of the TV when the vehicle is in transit.
- Easy locking system to lock the bracket against the wall when the vehicle is in transit.
- Mounting base includes a spirit level for quick and easy installation.
- Easy cable management system using removable plastic clips on the arms.
- Supplied with 2 bases so the bracket can be used in 2 locations on the RV.

## RV MEDIA Blu-ray DVD PLAYER

**“A GREAT ADDITION FOR 24” TVs AND A MUST FOR 32” + TVs!”**

**Enhance your RV with this dedicated Blu-ray player! The only 12V RV Blu-ray player available in Australia is an easy stand-alone addition to your RV’s Audio/Visual system.**

**KEY FEATURES**

- Plays Blu-ray discs, DVDs, CDs and media files via front SD card slot.
- Supplied with IR remote and BONUS IR remote extender allowing a second remote receiver to be placed in another location within the RV up to 4 metres away from the Blu-ray player.
- Outputs:
  - HDMI x 1.
  - Co-axial digital (for surround sound amplifiers etc).
  - 2 x RCA audio/video outputs. For TVs that may not have HDMI, or a second TV, plus the RCA audio output can be used to connect the audio to the TV input of RV Media head units using RCA leads.
- The system also includes a mounting cradle and brackets.
- Great for marine applications too!
- Note: This unit does not have an in-built amplifier. Audio is obtained via HDMI through the TV or via audio in on the head unit.

**DID YOU KNOW?**

DVD resolution is only 576 horizontal lines. Full HDTVs have 1080 horizontal lines of resolution (Standard HDTVs have 720 horizontal lines). Therefore if you watch a DVD on a Full HD TV, you are only seeing effectively 1/2 the maximum possible resolution and therefore picture clarity!

P/N 042494
