PORTABLE

Since 1982. Still going strong.

If you're after a proven reliable, extra-low power and versatile portable fridge, you're in the right place.

Bushman has been building the highest quality portable fridges and accessories for over 20 years. We don't make fridges to look fancy, we don't make them out of plastic, and we certainly don't include unnecessary gimmicks like wifi or Bluetooth. We believe a fridge should stay cold regardless of what you throw at it - and should always be at the temperature you set it to. To do this, we keep things pretty simple. After all, we believe that simplicity is the key to reliability.

If we're going to do something - we do it properly. If it works - we don't touch it. But if it breaks - we fix it straight away.

Welcome to Bushman Portable.

Roadie

15 LITRE FRIDGE / FREEZER

Super Compact + Premium Quality Fridge / Freezer

One of our best fridges, is also our smallest. The 15 litre Roadie really is best in class. It has an extensively modified and Bushman approved cooling system to reduce energy consumption. This will save you power, improve cooling performance and increase the life of your compressor. With a unique 31cm tall interior and narrow width, the Roadie is small enough to fit almost anywhere, but big enough to hold everything you need for a long drive. You can even stand up 1.25L soft drink bottles, champagne and wine bottles.

Keep a Bushman Roadie close and handy in your 4WD, RV, car, truck or agricultural equipment as the perfect centre console style fridge. The Roadie is also backed up by a full 3 year warranty and lifetime support from Bushman approved workshops Australia wide. And yes, you can use the Roadie as a dedicated freezer too.

FEATURES

Bushman reliable

- Local Australian quality control
- Nidec Danfoss compressor
- Custom soft rubber feet absorb vibrations
- Extra ventilation reduces heat to increase compressor life
- Powder-coated steel cabinet

Light on power

- Custom and oversize ventilation on the front and sides

Original Bushman Fridge

35 LITRE OR 35 – 52 LITRE

Driving and touring

Since 1998 our customers have thrown everything at this fridge. Rain - Hail - Sunshine, and it's still going strong. If you want a fridge that's extremely light on power and proven reliable for more than 2 decades, look no further. The Original Bushman Fridge stands the test of time, 20 years and counting. In 35L this is a great size fridge to use as your daily go-to, or as a true deep-freezer. At only 380mm high it fits easily in a tight spot, like under a bunk or in the back of a ute with a hard tonneau cover. Want more out of your fridge? Add a 35L – 52L Extension Kit anytime.

FEATURES

Reliable

- Steel construction
- Proven 20 years of use in Australia

Extra low-power

- Extensive 360° ventilation
- Tubular style condensor

Warranty

- 10L extension collar
- 7L dome lid
- Medium basket

12V CARAVAN

Highest on quality / lowest on power

DC-X SERIES

The new DC-X range of fridges are specially designed for built-in installation into caravans, boats, 4wd's and RVs. They are also a great fit for all off-grid situations. These are high quality, low power, beautifully designed fridges with a soft, matt black finish.

With a deep and narrow freezer design, these fridges have an outstanding amount of storage space and room for larger bottles.

You can install your DCX fridge flush mounted to your cabinet work, or with the supplied mounting kit.

DC-L SERIES

Our DC-L range of fridges are extremely efficient and light on power.

Designed specifically for mobile and off-grid living, these fridges use an oversized, low power cooling system that cools down quickly and efficiently, significantly reducing power consumption. This is a brilliant choice for caravans, RV's, boats and off-grid situations.

All our DC-L models are big on space, beautifully finished and have powder-coated finished sides, so they can be installed into a cavity or used in a free-standing position.

GAS

*No power, no solar, no batteries...
No problem!*

XCD SERIES

Perfect for off-grid residences, farms, holiday houses and longer-term camping. Our XCD fridges are specially designed with a low power and efficient absorption cooling system. These LPG fridges provide an excellent solution to your off-grid or remote refrigeration needs and will run for up to 3 months on a 45kg gas bottle. All XCD models have powder-coated finished sides, which gives you the option of built in or freestanding use.

XD SERIES

The XD series of chest freezers operate on both LPG and 240V AC. Our customers have used these models for a wide variety of applications including farms, houses, camp sites and bush blocks. If you need extra cold storage or are looking for an alternative to traditional AC power supply, the XD series is an excellent choice.
