NATHAN ASPINALL x ECHO PLAYER EDITION 90%

Introducing the Nathan Aspinall x ECHO Player Edition, a collaborative design with the 2023 World Matchplay Champion. This dart set features a 90% tungsten barrel with precision CNC-milled barrel with precision CNC-milled cross sections, nano grooves in the middle, and radial grooves towards the back, providing an optimal blend of precision and grip. Enhanced with a titanium nitride coating, the barrel is not only durable but also boasts an elegant finish.

The 26mm Black Swiss Point adds innovation with its patented locking system, enabling effortless switching of dart points. Taper and thread technology secure the points in place, offering stability and precision during play.

Discover the No.2 shaped K-Flex by Target Darts, a revolutionary integrated flight and shaft system seamlessly fused for durability and precision.

Lightweight

K-System flights are lighter than other moulded systems on the market allowing for a more consistent throw.

Patented Flex System

The shaft section of the K-Flex has been designed to move if hit by another dart, reducing the chance of a bounce out.

90 Degree Precision

Our injection moulding process means the flights are at perfect 90 degree angles out of the box and through their playing life.

Durability

A slight increase in thickness to the front and back edge of the flight increases durability
