

# FUTURE HARVEST NUTRIENTS

## Product Data Sheet

## PLANTACILLIN

### DILUTION RATE:

*Rooted Cuttings and Early Vegetative Growth:*

*1 ml per litre*

*Hydroponics, Soilless, and Coco:*

*2 ml per litre*

*Fruits, Vegetables, and Ornamentals:*

*4 ml per litre*

### GUARANTEED ANALYSIS:

Total Nitrogen (N) 2%

0.6% Ammonical Nitrogen

0.6% Nitrate Nitrogen

0.8% Urea Nitrogen

### GROWTH STAGE:

*Vegetative*

*Flowering*

### FREQUENCY:

*Every feeding until  
final stages of harvest  
before flushing.*

### Derived from:

*Ammonium Nitrate, Urea.*

### FOR USE IN:

*Soil, Coco, Hydroponics*

Plantacillin promotes enzymatic activity to establish a healthy root system. It assists in breaking down dead root material and aids in making nutrients more bioavailable to the plant.

Enzyme production will strengthen your plant's overall health and increase yields!

Plantacillin is not compatible with Hydrogen Peroxide.

## KEY FEATURES

- Helps increase overall root mass.
- It is effective and can be used in any stage of plant growth.
- Can be used on all grow media and systems - although mix well for hydroponic systems.

SIZE	HEIGHT X WIDTH	WEIGHT
500 mL	7.5 in x 2.5 in	1.1 lbs
1 L	9.0 in x 3.0 in	2.2 lbs
4 L	12.5 in x 6.3 in	9.0 lbs
10 L	14.5 in x 8.5 in	22.9 lbs
20 L	16.0 in x 10.0 in	48.1 lbs
208 L	35.0 in x 23.0 in	0 lbs
1000 L	46.0 in x 40.0 in	0 lbs
