

Combo Meter

3-in-1 meter measures pH, conductivity and temperature on the go

Boost plant health with our handheld 3-in-1 meter

- Know your pH: optimize nutrient uptake by ensuring your pH is in the correct range
- Know your nutrient strength: maintain accurate nutrient levels according to your plants' needs
- Know your temperature: ensure optimal nutrient uptake rates by keeping your nutrient solution temperature in check

The meter you can't do without

We need to constantly check that our temperature, pH and EC are perfect; it's the basis of everything we do. It's literally something you can't live without in a system like ours.

Kyle Pope | Founder and Director of Cultivation | Artisan Grown

Measure with precision

Customize scales to your preference - conductivity in EC, CF, ppm 500 or ppm 700; temperature in °C or °F.

Measure more, faster

Make measuring pH, conductivity and temperature a breeze. Access hard-to-reach locations with the 6.6 foot / 2 meter cable.

Accurate pH readings, every time

Enjoy straight forward pH probe maintenance and simple, 2-point calibration for increased accuracy.

Brilliantly simple

Our meter is easy to use, with a backlit display, auto-off functionality and replaceable pH probe.

A meter that's built for growers

The Bluelab Combo Meter is built to last a lifetime and comes with a 5-year limited written warranty

Detachable double-junction probe that comes with a 6-month limited written warranty

Waterproof conductivity and temperature probe that's easy to clean and is factory calibrated

Compare our meters

Get acquainted with the Bluelab range by comparing the Combo Meter with our other meters.
